

DSLR WORKSHOP 2017: Creative Control

On Saturday May 13, 2017 we celebrated creativity of a different kind turning people onto the immense possibilities of getting their camera off automatic and taking control of their imaging devices. Such fun, to see people get excited about F-stops and apertures. Many, many thanks to the instructors;

These folks put in huge amounts of time and creative energy in preparing their presentations. Do let them know of your appreciation. Funds raised by this almost annual workshop greatly augment KPAC's finances.

Much work goes on behind scenes and months in advance. Big thanks goes to Therese Alberts for liaison with the City, to Cara Gates of Parks & Rec, CBC Radio One, CFJC TV Midday Program. Kamloops This Week Community Calendar, everyone who spread word about the course and KPAC members who gave hands-on assistance to participants. As always; a stellar group effort. Bravo all !
