Kamloops Keynote Presentation: Mark Laurie 'A Peculiar Vision of Photography'

Mark has been around for a loonnng time. He is often annoyingly, but warmly, referred to as an institution, making him wonder when he lost his rebel mantel. He will explore that bemusement. Mark will share his passion for his craft, his nude portrait niche, the PPOC and the industry. He has been part of the changes from the past and remains a texture in the changes that are evolving. There will be insights, mirth, and even some ideas you can use. **Fri Oct 13th 7pm -\$25.** Mark's website <https://www.innerspiritphoto.com/>

The IGNITE Sessions are educational photography workshops with a keynote speaker and two components running in tandem: one program for emerging photographers and one program for established professional photographers. These not-for-profit photography workshops are sponsored by the Professional Photographers of Canada – BC Region. They run **Sat. 14th and Sun. 15th** at the Sandman Signature Hotel.

1) **IGNITE Workshops** were created to guide emerging photographers towards success. Master photographers, committed to making a difference in the photographic industry, volunteer their time to lead educational programs. Programs that refresh fundamental skills, reveal industry standards, and discuss sales and social media strategies, leaving local photographers with a sense of confidence and direction in their business.

2) **RE-IGNITE Workshops** are designed especially for established professional photographers. Join other professionals to exchange business ideas, review pricing, marketing, and social media strategies, brush up on important techniques, and re-ignite your creativity and productivity.

RESPONSIBLE NATURE PHOTOGRAPHY!

- must not do anything to injure or distress any animals or destroy their habitat to get an image
- must maintain an appropriate distance from an active nest, and usually avoid them entirely
- baiting of wildlife should be avoided as it may have long-term impacts
- don't stress out wildlife by getting too close
- should learn about the species' behaviour and ecology of the area
- use appropriate lenses and techniques that minimize stress
- should be a naturalist as well as a nature photographer
- should be especially careful and respectful when photographing '*species-at-risk*' and threatened species. Consider avoiding the photography of '*species-at-risk*'
